

FLU SHOT ALTERNATIVE

Avoid injection of toxic chemicals like thimerosal, ethylene glycol, phenol, formaldehyde, aluminum, and even antibiotics in your flu shot.

If you want safe, natural, homeopathic protection from cold and flu, instead of a chemical injection, this is for you!

**You have a choice in
managing your own health!!**

ALL NATURAL FLU SHOT!

You can't change your life . . . until you change your mind!

Dr. Ralph Potter
Naturopathic Physician

Dr. Potter has a safe alternative to the flu shot!

There is controversy about the traditional flu shot. Most of the controversy involves an ingredient called thimerosal, which is commonly used by manufacturers of the flu shot and other vaccines as a preservative.

Thimerosal is a mercury based preservative and over the last twenty years or so, it has been removed from many health care products in order to protect public health.

Thimerosal is a known neurotoxin, meaning it is a poison that damages or destroys nerve tissue. In small amounts, the human body can deal with the poison, but in larger amounts it can cause illness and death. A yearly flu shot alone may not contain enough mercury to cause problems, but because of environmental pollution, yearly flu shots are not the only source of possible mercury contamination.

Your choice . . .
Do you want to go
that way?

It is the possible effects of mercury from many sources including a yearly flu shot that causes concern. Preservative free flu shots are currently available for adults and children, but you may need to request them specifically.

“Their” Flu Shot

- Not guaranteed to protect you
- Contain toxic chemicals
- Grown and strained through animal or human tissue
- May not be the right strain for this year’s flu
- Read small print for side effects which may include flu!
- Efficacy research is inconsistent

The “Natural Flu Shot”

- Free from harmful side effects
- Free of preservatives/toxins
- Also used to treat and prevent the common cold!

Dr. Potter’s Natural Flu Shot contains B-Vitamins and homeopathic remedies focused on viral illness. As such, it can be helpful in both preventing and treating cold and flu.

A homeopathic remedy is a “super dilute” substance that would actually cause the symptoms it is preventing, if taken in the raw form. Homeopathy is “like-cures-like”, and its aim is CURE! It is safe and non-toxic.
